

Privacy Group:

- Talked about respondents, research subjects
- People don't understand confidentiality vs. anonymous
- Concerns about privacy can be ideological or partisan
- People may be so suspicious of government or corporate actors that they refuse to disclose much information about themselves
- Also concerns about privacy trends in larger terms, declining trust in institutions
- Not a lot of easy answers to these concerns
- How do we give people room to provide private responses?

national patents.

Group Theme:

Perceptions of data use and Communicating Value

Challenges

- Increasing distrust in institutions
- Articulating the value of Surveys and data Collection
- Explainability Challenges.

Road blocks to making Progress?

- Declining trust around the world w/ a lack of coherent strategy from the many institutions who are having these issues. How do we rebuild trust?

Privacy and Data
Security by Design

8

2) Balance b/t accuracy, utility, privacy

- Level of commitment to data privacy
- Transparency + communication of privacy rules

3) Transparency + Consent for RS

- Set realistic expectations about use of data
- Non-legislative mechanisms of privacy protection

Privacy and Data
